

IAFSB 2018

The fifth conference

Interdisciplinary Approaches in Fish Skeletal Biology

Tavira, Portugal, April 16-19, 2018

Everything about Fish Skeletal Biology: Evolution, Development, Genetics, Aquaculture, Morphology, Physiology, Biomedical Research, Palaeontology, Fish Nutrition, Comparative Skeletal Biology, Biomechanics....

Key Note Speaker: Gloria Arratia (University of Kansas)

Great Science at a Beautiful Location

IAFSB conferences promote the dialogue between disciplines that have a common interest in fish skeletal research and comparative skeletal biology. The emphasis of IAFSB is to facilitate discussions, the exchange ideas and concepts. The IAFSB location is ideal for this purpose. A beautiful historic fishing village turned into a hotel where we accommodate about 100 participants. All oral presentations are followed by extended discussions. There are no parallel sessions. Poster presentations get ample space and time.

Organizers: P. Eckhard Witten, Matthew P. Harris, M. Leonor Cancela

Scientific Committee: Brian K. Hall, Per Gunnar Fjellidal, Marc Muller, Ann Huysseune, Santosh P. Lall, Stefan Schulte-Merker, Jean-Yves Sire, Christoph Winkler, Clara Boglione, Gert Flik

Organizing Committee: Vincent Laizé, Paulo Gavaia, Natércia Conceição, Ignacio Fernández, Evi Desender, Joana Teixeira Rosa
