## BIOGRAPHY AND RESEARCH INTERESTS

Degree in Marine Biology (5-years course with undergraduate thesis), PhD in Geophysical Sciences-Physical Oceanography, and DSc (Habilitation/"Agregação") in Marine Sciences. More than 30 years of research experience on the relationships between the environment and marine organisms. Since 2000, is a Senior Scientist in IPMA (the Portuguese Institute for the Ocean and Atmosphere) and, since 2015, is also a member of the Group of Oceanography and Climate Changes (OC2) of the Centre of Marine Sciences of the University of Algarve (CCMAR). Presently, he is the Portuguese (National) Focal Point for IOC-UNESCO Argo Programme, Co-chair of the EuroGOOS/Euro-Argo Task Team, a member of the Joint PICES Study Group/ICES Council Strategic Initiative to plan participation in the UN Decade of Ocean Science (IPOD-ICES/PICES Ocean Decade), and the Presidente of the Portuguese Oceanography Society (APOCEAN). He was one of the Coordinators of the "Agenda do Mar" (Sea Agenda) for the Portuguese Science and Technology Foundation (FCT), the President of IPMA's Scientific Council (2012-2017), the President (2015-2016) and Vice-President (2014) of the Forum of State Laboratories Scientific Councils, IPMA's representative in EuroGOOS, a member of the Portuguese IGBP/Global Change Committee, and the National Representative for GLOBEC core project. He has been involved, as coordinator and PI, in more than 40 national and international projects (12 as a coordinator or PI). In the last years, his research has focused on the physical-biological interactions in the ocean throughout an end-to-end approach, on the impact of global change in the ocean, and on the development of ocean observing systems. This is reflected in more than 100 publications (56 as Scopus documents) with more than 2830 citations (3 publications with more than 200 citations, 5 with more than 150, and 10 with more than 100) and an h-index of 28 (Scopus). Other areas of interest/expertise are fisheries oceanography, fish ecology, mainly of pelagic species, and the applications of remote sensing to marine fisheries and oceanography.
